## Benefits

- Guaranteed to work with Trimm Optimum Value Breaker panels
- Easily replace breakers or add new positions to your panel with the tab connections.
- Integrated handle guards protect the rockers from accidental operation.
- Snap-acting breaker assures immediate opening and closing of the contacts increasing the reliability.

## Used In Trimm Panels

- 907 Series Optimum Value Breaker Panels

## OV Breakers

## How to Configure Trimm Optimum Value Breaker Panels

It is easy to order Trimm Optimum Value Breaker Panels Factory Configured.
Take the base panel part number and add the last letter from the breakers you need.

## Rules:

1) On panels with two sides that can be configured the sides will be identical. So if there is a 30 Amp breaker in position one on Side A, there will be one on Side B too.
2) Versa-Slots cannot be factory configured.
3) All non-configured positions are factory filled with blanks.
4) Blanks in between breakers are indicated with an " $X$ ". If there are no breaker letters in the last configurable positions they will be filled with blanks.

Example 1: You want to configure a 9072101001 with two 30A breakers, blanks on each side, and the last two positions filled with 5A breakers.

Example 2: You want to configure a 9074101501 with one 30A breaker, one blank, two 10A breakers, and three 3A breakers. You will order the Versa-Slot positions on separate line items.

5 Amp Breaker in Position 5 on Side A. 10 Amp Breaker in Position 4 on Side A. 10 Amp Breaker in Position 3 on Side A. Blank in Position 2 on Side A. 30 Amp Breaker in Position 1 on Side A.

Gonfigurable Optimum Value Breaker Panels (other voltages available)

| Part Number | Side A | Side B | Width |
| :---: | :---: | :---: | :---: |
| 9075101001 _ | 8 Configurable Positions | None | 19" |
| 9071101501 _ - - - - - | 6 Configurable Positions | 2 Versa-Slots (Cannot be configured) | 19" |
| 9072101001 | 6 Configurable Positions | 6 Configured Positions (same as Side A) | 19" |
| 9073101001 _ | 8 Configurable Positions | 8 Configured Positions (same as Side A) | 23 " |
| 9074101501 | 8 Configurable Positions | 2 Versa-Slots (Cannot be configured) | 23 " |
